ABOUT ME

I have always been passionate about learning new things and playing games that pose intellectual challenges. Because of that, I was fascinated to find a field like programming, where problem-solving prevails and topics are constantly evolving. This fascination increased when I found web development, verifying that I could develop useful software with attractive graphical interfaces. From that moment, I knew I had found the profession I wanted to dedicate myself to for the rest of my life. Since then, I have specialized in web development through courses and bootcamps, which allow me to develop pages and web applications from the backend to the frontend, applying the basics and good practices of software engineering learned at college.

EDUCATION

2016 - 2021	System Engineer
Santa Ana de Coro, Venezuela	Universidad Nacional Experimental de la Fuerza Armada

COMPLEMENTARY EDUCATION
